The Guide to Latin America Pension Funds

The tables following present key data from The Guide for the pension funds managed by the Mexican 'AFORE' Banamex :

- Assets under Management and asset allocations in US\$, for end-2007 to end-2010; December 2011 forthcoming in September 2012*
- One-year, & 3-year changes in assets, in US\$ *
- External asset managers' data
- Key Contact data for AFORE Banamex
- Plus – a summary table of investment regulations governing SIEFORES

* The same information is available in local currency terms and in the same formats, but is not shown here for brevity's sake.

Mexico – BANAMEX Pension Fund broken down into 5 SIEFORE Plans

	Mutual Funds	Yes	Yes	Yes	Yes	Yes
	Derivatives	Yes	Yes	Yes	Yes	Yes

* This table is a summary of the current regulation and it is for explanation purposes only. The limits apply to the Basic SIEFORES. Additional SIEFORES (e.g., voluntary savings) can determine different parameters according to their prospectus and in compliance with the SAR Law.

1- All the limits are maximum percentages, except the inflation protection limit, which is a minimum percentage of assets (see note 9).

2- As a percentage of the Assets Under Management (AUM) directly managed by the SIEFORES.

3- As a percentage of the Total AUM of the SIEFORES, including the assets managed by the Specialized Investment Manager (SIM or "Mandatario").

4- Includes individual stocks; IPOs; authorized equity indexes (domestic and international) and mandatory convertible debt from Mexican issuers.

5- Rating of the medium- and long-term issue, as well as the issuer and/or endorser, in the corresponding proportion. Repo and derivatives operations are computed within these limits.

6- Apply to the asset holdings of all the pension funds (SIEFORES) operated by the same fund manager (AFORE), and for domestic or foreign debt and structured securities. This limit may be exceeded by the CKD if they meet the conditions stipulated by the Investment Regime Provisions.

7- Securitized securities that fulfill Annex O of the Investment Regime Provisions are computed in this limit, which are considered as issued by an independent.

8- Includes CKDs and Mexican REITs (FIBRAS). The Structured Securities in turn are divided into two: a) Infrastructure or Housing, on one side, and b) Others (Private Equity).

9- Minimum investment limit in securities that ensure a return equal or higher than the inflation in Mexico.

10- Limit is established in the SAR Law, Art. 48, Paragraph X. In exceptional cases it could be increased up to 10%. The limit is 0% for financial entities with patrimonial affiliations.
